

**Award Winner: 2025 Small Business Professional of the Year for Washington, D.C.**  
Craig Williams, CEO, Cyber Synergy, LLC

**CYBER SYNERGY**  
CAPABILITIES STATEMENT

# Delivering the Power of Synergy

Our proven track record of delivering world-class cybersecurity enables senior leadership to achieve mission-critical objectives by delivering tailored cybersecurity strategies. Our expertise bridges technical excellence with strategic vision, fostering long-term resilience and operational success.

## Cyber Synergy: Our Key Differentiators

- ✓ **Proactive Leadership Support:** Collaborating with senior leaders to align cybersecurity initiatives with strategic priorities.
- ✓ **Comprehensive Cybersecurity Risk Mitigation:** Delivering tailored strategies that address technical gaps and provide actionable insights for resilience.
- ✓ **Forward-Thinking Expertise:** Leveraging emerging technologies to deliver innovative, scalable solutions for mission-critical environments.

## OUR CORE SERVICES

### Cybersecurity

We serve as strategic advisors to senior leadership. We assess, develop, and implement cybersecurity strategies that mitigate risks and align with overarching mission objectives.

- CTTX Coordination
- Security Assessment/CMMC
- Threat Remediation
- Penetration Testing

### Enterprise Technology

Our development team leverages the latest technology to deliver innovative solutions that optimize performance and keep your organization ahead in a dynamic digital landscape.

- Mobile App Development
- Cloud-Based Solutions
- Database Development
- Portal Development

### Facilitation & Training

We enable senior leaders to identify critical risks, strengthen collaboration, and make informed decisions to enhance organizational resilience.

- CTTX Facilitation
- Organizational Strategy
- Cybersecurity
- Custom Course Development
- Instructional Design

### Clients and Partners include:

### Contract Vehicles:

GSA 8(a) MAS Pool  
GSA 8(a) STARS III Contract #: 47QTCB21D0433  
SeaPort-NxG Contract #: N0017825D7241

# CYBER SYNERGY PAST PERFORMANCE

Department of War (DoW)

## Cybersecurity Vulnerability Evaluation, Strategy, and Mission Risk Support

Collaborates with senior leadership at a classified DoW agency to guide cybersecurity assessments, strategy, and lifecycle activities supporting mission-critical and national security systems. The team conducts cybersecurity vulnerability evaluations, comprehensive risk and mission-based assessments on major DoW weapon systems, and provides leadership for reverse engineering teams supporting cyber risk identification and analysis. Efforts include supporting technical activities and peer reviews, monitoring vulnerability assessment efforts, and strengthening cybersecurity posture. Cyber Synergy also supports the development of cybersecurity strategies, performance metrics, and automated solutions, aligning processes with mission objectives and improving workflow efficiency. Through structured discussions and scenario-based analysis, the effort enhances incident response readiness, strengthens stakeholder collaboration, and provides actionable insights that improve resilience and fortify the organization's cybersecurity service offering.

U.S. Cyber Command (USCC)

## Defensive Cybersecurity Operations and Strategic Mission Support

Provides cybersecurity operations and strategic mission support to U.S. Cyber Command environments focused on strengthening the security, resilience, and readiness of mission-critical networks. Support includes defensive cyber operations, continuous network monitoring, and secure network environment support aligned with operational mission priorities and the Risk Management Framework (RMF). Work contributes to authorization, continuous monitoring, and risk posture management, supporting informed leadership decisions and sustained mission execution. Through close coordination with mission and technical stakeholders, this effort strengthens day-to-day cybersecurity operations and supports strategic alignment between cyber risk management and operational objectives in high-tempo environments.

Defense Information Systems Agency (DISA)

## Cybersecurity Supply Chain Risk Management

Produces assessment reports, white papers, briefings, and requirements documentation to evaluate risk and recommend actionable courses of action to senior leadership, strengthening enterprise information infrastructure resilience. Partners with key DISA stakeholders to deliver results on time and within scope. Provides analysis supporting DISA risk acceptance, avoidance, and mitigation strategies, incorporating single points of failure, supply chain risks, and seams-and-gaps assessments tied to DoW critical asset identification efforts.

USDA Forest Service

## Enhanced PSI Protection

Partners with the USDA Forest Service to strengthen its Personally Sensitive Information (PSI) Protection Program. Applying federal standards, including NIST guidelines, Cyber Synergy evaluates and enhances data handling processes to support regulatory compliance and reduce risk. The engagement includes strategic planning, detailed process analysis, targeted training, and continuous monitoring to address vulnerabilities across the storage, sharing, and disposal of PSI. The result is stronger PSI security controls, improved stakeholder awareness, and practical, actionable recommendations that sustain compliance and operational effectiveness over time.

Health and Human Services Office of Information Security (OIS)

## Cybersecurity Support

Provides cybersecurity support to the HHS Office of Information Security (OIS) in support of protecting sensitive data and meeting federal cybersecurity requirements. Work includes governance, risk management, compliance, incident response, vulnerability management, and cybersecurity training aligned with HHS OIS expectations. The effort emphasizes disciplined program management, audit readiness, structured reporting, and risk-based decision support to strengthen operational resilience and enable informed leadership decisions.

U.S. Army

## Website Support, Communications and Technical Outreach

Provides professional and technical services, website management support, social-media support services, and conference-related services. Additionally, our team is developing a Customer Relations Management (CRM) Tool to enable increased engagement with small businesses and a mobile application mirroring key OSBP website content, providing an alternative way for small businesses to reach AOSBP and to receive data and targeted announcements.
